## Rate Resolution for 2021/22

Council will be considering the rates for the 2021/22 financial year at the June 2021 meeting, ahead of adopting its annual plan and budget estimates.

A General rate increase of 4.80% has been proposed following a zero movement in the 2020/21 year.

The Community has faced a turbulent 18 months and to enable Council to continue providing essential services at current levels it is prudent to keep up with inflation (4.5% over the same period). The General rate increase will continue to support services such as tourism, youth and community events, recreation facilities and a vast network of roads and bridges.

Circular Head Mayor Daryl Quilliam says *"Council is committed to reviewing its operating activities to ensure they provide a value for money benefit for the community"*.

Council will continue to support ticket free entry to the White Hills waste disposal site, as well as keeping wheelie bin collection costs the same as last year.
